HOTEL LINDRUM - MELBOURNE

THE LEADING COMMERCIAL UPHOLSTERY RESOURCE

HOTEL LINDRUM, MELBOURNE Interior: Terry Fripp Design + Neil Bradford Interiors & Design.

DESIGN VISION: A stylish, cosy hotel like the newest designer hotels in New York, London and Paris. There's simplicity of form, line and space with a sophisticated selection of finishes, textures and accessories to complement and embellish the architecture; the mood is like a very smart club.

FURNITURE: The models for public spaces and bars, including a modern version of the classic wing back chair were custom designed for the club feel and Moran comfort. In the lobby, large comfortable chairs invite guests to unwind in front of the fire. Guest suite pieces like the high backed

and high armed fully upholstered bedroom chairs are standard Moran models scaled up to be in proportion with the generous size of the rooms. The Chaise was scaled down to fit at the end of the bed.

A GREAT FINISH: The furniture was to complement the history of the property. The design bridges a classically modern feel with the historic importance of the building. This is a grand boutique hotel that takes guests by surprise with its layers of interest, serene comfort in a classic international way.
